TRẦN CÔNG PHÚ

FRONTEND DEVELOPER

Email: congphu2210@gmail.com

Phone: 0937 800 847

Location: Go Vap District, Ho Chi Minh City.

PROFESSIONAL SUMMARY

Results-driven Frontend / Hybrid Mobile Engineer with over 5 years of hands-on experience designing and scaling high-performance web and mobile enterprise applications.

Proven expertise in building modular frontends, reusable component-driven design systems, and resilient multi-tenant architectures from scratch.

Adept at driving multi-tenant solutions, optimizing, managing complex asynchronous states, and ensuring compliance, web accessibility (a11y), and top-tier runtime performance.

Utilizes modern AI coding tools daily to accelerate boilerplate generation, testing, and refactoring while ensuring clean and robust code standards.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Information Technology

TECHNICAL SKILLS

- **Core & Languages:** HTML, CSS/SCSS, TypeScript, JavaScript (ES6+), Web Accessibility (a11y), Firebase.
- **Frontend:** Angular, ReactJS, NextJS.
- **Mobile:** React Native, Ionic, Capacitor, Cordova.
- **UI & Design Systems:** , StencilJS, Angular Library, Angular Material (CDK), Ant Design, Bootstrap, Micro-frontends, Component-driven UI.
- **State Management & Patterns:** NgRx, RxJS, Modular Architecture.
- **Analytics & Tracking:** Firebase Analytics, GA4, Matomo, Google Tag Manager.
- **Devops & Practices :** GitOps, CI/CD pipelines.

PROFESSIONAL EXPERIENCE

MERCATUS | Canada

Mobile Developer | 06/2023 – present

Project: DXPro E-Commerce Platform — Enterprise-grade, multi-tenant commerce ecosystem deployed across multiple regional grocery & retail chains, serving millions of active shoppers.

Site: https://www.mercatus.com/platform-overview/

- **Cross-Platform UI Architecture:** Built reusable Web Components, build core frontend modules used on Web/Mobile/Tablet apps (Ionic/Capacitor/Cordova).
- **Multi-Tenant & Dynamic CMS:** Built dynamic UI widgets integrated with CMS, user independently customize and publish custom layouts on Web/Mobile/Tablet without code deployments.
- **AI & Architecture Docs:** Applied AI coding assistants to generate boilerplate code, write test cases, and create structured TSD/TSA documentation
- **Solution Architecture:** Provided frontend technical design and solution for core e-commerce features to enterprise grocery requirements.
- **Internal CLI & Automation:** Created an internal CLI tool to automate daily internal workflows.
- **Third-Party & SDK Integrations:** Integrated enterprise SDKs using clean adapter layers to support implement third-party vendors across different clients.
- **Mobile Builds & Production Releases:** Managed hybrid mobile builds (Ionic/Capacitor/Cordova), resolving iOS/Android native issues and releasing client apps to the App Store and Google Play.

Tech Stack: Angular, Angular Signals, Ionic, Capacitor, StencilJS, TypeScript, Firebase, Git.

CUBABLE | Vietnam

Front-End Developer | 04/2021 – 04/2023

Project: Cubable — No-Code & Workflow Automation Platform enabling businesses to build relational databases and automate custom operational workflows.

Site: https://cubable.com/

- **Scalable UI Architecture:** Designed and built core frontend modules and an extensive reusable UI component library supporting real-time data binding, dynamic grids, and drag-and-drop workflow builders.
- **Multi-Workspace & Performance Optimization:** Engineered scalable multi-workspace architectures and optimized client-side performance.
- **Reusable Components & Library Extension:** Customized UI components and customized open-source libraries, standardizing UI behaviors, and improving overall maintainability across engineering teams.
- **Collaboration & Standards:** Worked directly with Product Managers and UI/UX designers to translate ambiguous product requirements into technical specs, establishing coding standards.

Tech Stack: Angular, Angular CDK, TypeScript, NodeJS, Git.

FPT INFORMATION SYSTEM | Vietnam

Full-Stack Developer | 01/2020 – 04/2021

Project: Go!Bus (Public Transit Navigation app for HCMC, currently is MultiGo) & Enterprise Smart City Solutions.

Site: https://multigo.golabs.vn/

- **Enterprise Application Delivery:** Developed end-user features and responsive web/mobile interfaces for large-scale public initiatives across Smart City, Healthcare, Banking and social services.
- **API & Data Layer:** Designed backend REST endpoints and connected them with Angular clients, implementing client-side caching strategies and robust error interceptors.
- **Containerization & Deployment:** Maintained production application health, diagnosed bottlenecks in live environments, and supported containerized deployments via Docker and Kubernetes.
- **Technical Documentation:** Authored technical design documents (TDD), system interaction diagrams, and integration guides for municipal and enterprise clients.

Tech Stack: Angular, Angular Material, Ionic, Cordova, ThingsBoard, NestJS, TypeScript, Git.

SOFT SKILLS

- **Problem Solving & Analytical Thinking:** Strong ability to diagnose complex frontend bugs, optimize performance bottlenecks, and architect efficient solutions.
- **AI Integration & Workflow Automation:** Leveraging AI workflows and generative tools to optimize development tasks, reduce boilerplate code, and enhance overall engineering efficiency.
- **Agile & Scrum Methodologies:** Experienced in working in fast-paced Agile environments, participating in sprint planning, retrospectives, and code reviews.
- **Mentorship & Leadership:** Guiding developers, promoting best coding practices, and fostering technical knowledge sharing within the team.
- **Adaptability & Continuous Learning:** Quickly adapting to new technologies, frameworks, and AI-driven workflows to enhance productivity.
